43 ZEAS CLAVIJO JOEL ALEXANDER

The screenshot displays a Windows desktop environment. The top window is a terminal titled "Selección Símbolo del sistema" showing a series of Git commands and their outputs. The commands include creating multiple README files in a directory structure, adding them to the index, committing them to the 'main' branch, and pushing the commit to a remote repository on GitHub. The bottom window is a Java application titled "Símbolo del sistema - java MultiplicationTable.java". It displays a "Multiplication Table Calculator" interface. The user has entered "Type 1" for multiplication tables and "27" for the number. The application then displays a multiplication table for 27, ranging from 1x27 to 12x27. Below the first table, it says "It's odd". The user has then entered "Type 0" to end the program, and the application displays another multiplication table for 2, ranging from 1x2 to 4x2.
