

Command Prompt

```
switch      Switch branches
tag         Create, list, delete or verify a tag object signed with GPG

collaborate (see also: git help workflows)
fetch      Download objects and refs from another repository
pull       Fetch from and integrate with another repository or a local branch
push       Update remote refs along with associated objects

'git help -a' and 'git help -g' list available subcommands and some
concept guides. See 'git help <command>' or 'git help <concept>'
to read about a specific subcommand or concept.
See 'git help git' for an overview of the system.
```

```
C:\Users\DELL>git --version
git version 2.33.1.windows.1
```

```
C:\Users\DELL>
```
