UmlExercise - Apache NetBeans IDE 12.4

The screenshot displays the Apache NetBeans IDE 12.4 interface. The top menu bar includes File, Edit, View, Navigate, Source, Refactor, Run, Debug, Profile, Team, Tools, Window, and Help. The toolbar contains various icons for file operations, running, and debugging. The main workspace is divided into three panes:

- Navigator:** Shows the project structure for 'UmlExercise'. It includes a 'Source Packages' folder with sub-packages 'ec.edu.espe.farm.model' and 'ec.edu.espe.farm.view'. The 'ec.edu.espe.farm.model' package contains 'Chicken.java', 'Egg.java', and 'Poop.java'. The 'ec.edu.espe.farm.view' package contains 'FarmSimulator.java'. There are also 'Test Packages', 'Libraries', and 'Test Libraries' folders, and a 'FichaEstudiante' file.
- Source:** Displays the code for 'FarmSystem.java'. The code includes class declarations for 'B', 'C', 'D', and 'E', and a main method that initializes arrays 'cs' and 'ds', and creates objects 'a', 'b', 'c', and 'd'.
- Output - UmlExercise (run):** Shows the output of the program. It lists the contents of arrays 'cs' and 'ds' (all null), and the creation of objects 'c', 'd', and 'e'. The output ends with 'BUILD SUCCESSFUL (total time: 0 seconds)'.

The bottom status bar shows the current file is 'Output', the cursor is at line 36, column 1, and the encoding is 'INS'. The system tray at the bottom right shows the date and time as 28/11/2021 23:24, and the weather as 15°C Lluvia ligera.
