The screenshot displays an IDE with the following components:

- Projects View:** Shows a project structure with packages like `ec.edu.espe.farm` and `ec.edu.espe.farm2`. The `Chicken.java` file is selected.
- Source View:** Displays the code for `Chicken.java`. The code is as follows:

```
1 package ec.edu.espe.farm;
2
3 import java.util.Scanner;
4
5 /**
6  *
7  * @author Christian Bravo
8  */
9 public class Chicken {
10
11     public static void main(String[] args) {
12
13         Scanner dato1 = new Scanner(System.in);
14
15         int id = 0;
16         System.out.println("Please enter the id of the chicken");
17         id = dato1.nextInt();
18         System.out.println("id -->" + id);
19
20         Scanner dato2 = new Scanner(System.in);
```
- Members View:** Shows the `Chicken` class with methods `Chicken()` and `main(String[] args)`.
- Output View:** Shows the execution output for `main - Farm2 (run)`. The output is as follows:

```
run:
Please enter the id of the chicken
12344667
id -->12344667
Please enter the name of the chicken
Mary
name -->Mary
Please enter the age of the chicken
2
age -->2
Please enter the color of the chicken
```
