## ASSOCIATIONS

The screenshot shows an IDE with a Java source file and its output. The source file, `FarmSystem.java`, contains the following code:

```
11  */
12  public class FarmSystem {
13      public static void main(String[] args) {
14          System.out.print("WS10 Associations --> Alan Shuguli <--");
15          Egg egg=new Egg();
16          Poop poop=new Poop();
17          Chicken chicken=new Chicken();
18
19          System.out.println("The egg");
20          System.out.println("-->" + egg);
21
22          System.out.println("The poop");
23          System.out.println("-->" + poop);
24
25          System.out.println("The chicken");
26          System.out.println("-->" + chicken);
27
28          System.out.println("chicken activities");
29          chicken.doStuff(0);
30      }
31  }
```

The output window shows the following text:

```
run:
WS10 Associations --> Alan Shuguli <--The egg
-->ec.edu.espe.farm.model.Egg@7cca494b
The poop
-->ec.edu.espe.farm.model.Poop@7ba4f24f
The chicken
-->ec.edu.espe.farm.model.Chicken@3b9a45b3
chicken activities
This chicken is clucking ...This chicken is wandering ...This chicken is eating ...BUILD SUCCESSFUL (total time: 0 seconds)
```
