

# OOP HW21 Project Test Cases

DATE: 10th february 2022

21 GUITARRA SANCHEZ JHON ALEXANDER

The image displays two screenshots of the Apache NetBeans IDE interface, showing the results of a JUnit test run for the `FinalPriceTest` class.

**Top Screenshot (Failed Tests):**

- Test Results:** 8 tests passed, 2 tests failed. (0.235 s)
- Failed Tests:**
  - `testFinalPrice6` Failed: expected:<37.79999923706055> but was:<37.84499740600586>
  - `testFinalPrice9` Failed: expected:<7.679999828338623> but was:<7.680000305175781>
- Tested Methods:** testFinalPrice10, testFinalPrice2, testFinalPrice3, testFinalPrice4, testFinalPrice5, testFinalPrice6, testFinalPrice7, testFinalPrice8, testFinalPrice9, testFinalPrice1.

**Bottom Screenshot (All Tests Passed):**

- Test Results:** All 10 tests passed. (0.138 s)
- Tested Methods:** testFinalPrice10, testFinalPrice2, testFinalPrice3, testFinalPrice4, testFinalPrice5, testFinalPrice6, testFinalPrice7, testFinalPrice8, testFinalPrice9, testFinalPrice1.

The source code for `FinalPriceTest.java` is visible in the background of both screenshots:

```
1 package ec.edu.espe.electricalPower;
2
3
4 import org.junit.Test;
5 import static org.junit.Assert.*;
6
7 /**
8  *
9  * @author jhon guitarra
10 */
11 public class FinalPriceTest {
12
13     public FinalPriceTest() {
```
