

```
C:\WINDOWS\system32\CMD.exe

grep      Print lines matching a pattern
log       Show commit logs
show      Show various types of objects
status    Show the working tree status

grow, mark and tweak your common history
branch    List, create, or delete branches
commit    Record changes to the repository
merge     Join two or more development histories together
rebase    Reapply commits on top of another base tip
reset     Reset current HEAD to the specified state
switch    Switch branches
tag       Create, list, delete or verify a tag object signed with GPG

collaborate (see also: git help workflows)
fetch     Download objects and refs from another repository
pull      Fetch from and integrate with another repository or a local branch
push      Update remote refs along with associated objects

'git help -a' and 'git help -g' list available subcommands and some
concept guides. See 'git help <command>' or 'git help <concept>'
to read about a specific subcommand or concept.
See 'git help git' for an overview of the system.

C:\Users\JENNY BENALCAZAR>git --version
git version 2.33.1.windows.1
