```
Simbolo del sistema
bisect          Use binary search to find the commit that introduced a bug
diff            Show changes between commits, commit and working tree, etc
grep            Print lines matching a pattern
log             Show commit logs
show            Show various types of objects
status          Show the working tree status

grow, mark and tweak your common history
branch          list, create, or delete branches
commit          Record changes to the repository
merge           Join two or more development histories together
rebase          Reapply commits on top of another base tip
reset           Reset current HEAD to the specified state
switch          Switch branches
tag             Create, list, delete or verify a tag object signed with GPG

collaborate (see also: git help workflows)
fetch           Download objects and refs from another repository
pull            Fetch from and integrate with another repository or a local branch
push            Update remote refs along with associated objects

'git help -a' and 'git help -g' list available subcommands and some
concept guides. See 'git help <command>' or 'git help <concept>'
to read about a specific subcommand or concept.
See 'git help git' for an overview of the system.

C:\Users\DARK>git --version
git version 2.33.1.windows.1
