Career: Telecommunications

43. ZEAS CLAVIJO JOEL ALEXANDER

The screenshot shows a Windows 10 desktop with a dark theme. The taskbar at the bottom includes the Start button, a search bar with the text 'Escribe aquí para buscar', and several application icons. A terminal window titled 'Símbolo del sistema' is open, displaying the output of the 'git help' command. The terminal text is as follows:

```
init          Create an empty Git repository or reinitialize an existing one

work on the current branch
add           Add file contents to the index
mv            Move or rename a file, a directory, or a symlink
restore       Restore working tree files
rm            Remove files from the working tree and from the index
sparse-checkout Initialize and modify the sparse-checkout

examine the history and state (see also: git help revisions)
bisect        Use binary search to find the commit that introduced a bug
diff          Show changes between commits, commit and working tree, etc
grep          Print lines matching a pattern
log           Show commit logs
show          Show various types of objects
status        Show the working tree status

grow, mark and tweak your common history
branch        List, create, or delete branches
commit        Record changes to the repository
merge         Join two or more development histories together
rebase        Reapply commits on top of another base tip
reset         Reset current HEAD to the specified state
switch        Switch branches
tag           Create, list, delete or verify a tag object signed with GPG

collaborate (see also: git help workflows)
fetch         Download objects and refs from another repository
pull          Fetch from and integrate with another repository or a local branch
push          Update remote refs along with associated objects

'git help -a' and 'git help -g' list available subcommands and some
concept guides. See 'git help <command>' or 'git help <concept>'
to read about a specific subcommand or concept.
See 'git help git' for an overview of the system.

C:\Users\JOEL>git --version
git version 2.33.1.windows.1

C:\Users\JOEL>
```

The system tray at the bottom right shows the date and time as 28/10/2021 17:04, along with weather and network icons.
